

CSE464/CSE564/ Homework #0 Due 2005.01.24 at 9:00AM (E-mail portion), 4PM for remainder

Note: Usually homework will be due at 4:00PM, one week after assignment.

1. Send e-mail to fred@cse.wustl.edu with a subject that contains:
your_last_name#your_first_name#your_e-mail_address#a_secret_password

Please follow the format exactly including the “#” characters. This will allow easy extraction of the information by me using grep/emacs. Your secret_password will be included in web pages with grade information so only you will know which grades are yours. If you do not wish your grades posted on the web pages omit this field and your grade information will be omitted from the web page. Please submit this e-mail by 9AM on 2004.01.24.

2. Look at several messages to the signal-integrity mailing list and comment briefly (very briefly) on one that you understand, and one that you do not understand. Include a copy of the ones you refer to with your homework. <http://www.qsl.net/wb6tpu/si-list/>
One you might look at is: “Clock routing width/impedance”, Steve Rogers, Thu Mar 01 2001 - 00:04:56 PST.

3. On a *separate piece of paper* (or separate e-mail, this will not be returned to you) list:

A. Your name and home city/state/country.

B. Have you taken EE314/ESE330 (Engineering Electromagnetics I) or equivalent (Yes/No)

C. What do you like or enjoy (e.g. bridge, volleyball, bicycling, PDA, elegant electronic circuits, good questions, ...)?

D. What do you dislike (e.g. Students who are always late to class, obnoxious automobile drivers, flaky electronic circuits that work sometimes and don't work sometimes, poor answers, ...)?

4. Read the form for academic integrity on the SEAS web page. If you agree, sign statement below and submit with your homework.

SEAS policy on academic integrity:

<http://registrar.seas.wustl.edu/Undergraduate/academicintegrity.htm>

I have read and understand the SEAS policy on academic integrity. I also understand that any help, assistance, or information that I obtain and use in submitted homework must be acknowledged on the first page of that homework.

Name (printed): _____

Signature: _____ Date: _____
