The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

**TERABIT CAPACITY, FLEXIBLE-GRID OPTICAL TRANSMISSION SYSTEMS, AND ADVANCED ACCESS NETWORK: JOINT SESSION WITH CONFERENCES 8645, 8646, AND 8647**

### 8645 03

100-GHz and 300-GHz coherent radio-over-fiber transmission using optical frequency comb source [8645-2]
A. Kanno, T. Kuri, I. Hosako, T. Kawanishi, National Institute of Information and Communications Technology (Japan); Y. Yasumura, Y. Yoshida, K. Kitayama, Osaka Univ. (Japan)

### 8645 04

FDMA-PON architecture according to the FABULOUS European project [8645-3]
S. Abrate, Istituto Superiore Mario Boella (Italy); R. Gaudino, Politecnico di Torino (Italy); B. Charbonnier, France Telecom Orange (France)

**NEXT GENERATION ACCESS NETWORK**

### 8645 06

Active devices in next-generation access networks (Invited Paper) [8645-5]
L. H. Spiekman, Alphion Corp. (United States)

### 8645 07

Constellation design for next-generation hierarchically-modulated PON systems [8645-6]

### 8645 08

WDM-PON budget extension techniques for Nx10 Gbit/s DPSK signals [8645-7]
A. Emsia, Q. T. Le, D. Briggmann, F. Küppers, Technical Univ. Darmstadt (Germany)

### 8645 09

Next generation PON evolution (Invited Paper) [8645-8]
A. Srivastava, Indian Institute of Technology, Mandi (India)

### 8645 0A

Chirp-managed lasers as cost-efficient transmitters for 10-Gbit/s WDM-PONs [8645-9]
Q. T. Le, A. Emsia, D. Briggmann, F. Küppers, Technical Univ. Darmstadt (Germany)

**MM-WAVE-, RADIO-OVER-FIBER SYSTEMS, AND COHERENT WIRELESS LINKS**

### 8645 0B

Developments in photonic and mm-wave component technology for fiber radio (Invited Paper) [8645-10]
S. lezekiel, Univ. of Cyprus (Cyprus)

### 8645 0D

Seamless integration of 100-G wire line and 100-GHz wireless link system (Invited Paper) [8645-12]
Z. Dong, ZTE USA (United States); J. Yu, X. Li, N. Chi, Fudan Univ. (China)
Effect of the degree of phase-correlation of laser sources on the transmission and optical coherent detection in radio-over-fibre systems [8645-13]
R. Maldonado-Basilio, R. Li, S. Abdul-Majid, H. Nikkhah, Univ. of Ottawa (Canada); K.-W. Leong, Viscore Technologies Inc. (Canada); T. J. Hall, Univ. of Ottawa (Canada)

Power consumption of communication systems employing radio-over-fiber distributed antenna systems for railway [8645-14]
T. D. Pham, A. Kanno, T. Kawanishi, National Institute of Information and Communications Technology (Japan)

Optical wireless applications: a solution to ease the wireless airwaves spectrum crunch (Invited Paper) [8645-15]
M. Kavehrad, The Pennsylvania State Univ. (United States)

Novel 60 GHz CPW array antennas with beam-forming features for indoor wireless over fiber networks [8645-16]
I. Petropoulos, S. Mikroulis, A. Bogris, Technological Educational Institute of Athens (Greece); H. Simos, Technological Educational Institute of Piraeus (Greece); K. Voudouris, Technological Educational Institute of Athens (Greece)

Investigation on a low-cost single wavelength converged wired-60 GHz wireless OFDM-based system employing a photonic patch antenna [8645-18]
S. Mikroulis, Technological Educational Institute of Athens (Greece) and Athens Information Technology (Greece); I. Aldaya, Telecom ParisTech (France); I. Petropoulos, Technological Educational Institute of Athens (Greece); E. Giacoumidis, Telecom ParisTech (Greece); K. Voudouris, Technological Educational Institute of Athens (Greece); I. Tomkos, Athens Information Technology (Greece)

Proposal of adaptive wireless cell configuration for RoF-DAS over WDM-PON system [8645-19]
T. Iwakuni, Osaka Univ. (Japan); K. Miyamoto, NTT Access Network Service System Labs. (Japan); T. Higashino, Nara Institute of Science and Technology (Japan); K. Tsukamoto, Osaka Institute of Technology (Japan); S. Komaki, Malaysia-Japan International Institute of Technology (Malaysia); T. Tashiro, Y. Fukada, J. Kani, N. Yoshimoto, NTT Access Network Service System Labs. (Japan); K. Iwatsuki, Tohoku Univ. (Japan)

QPSK modulation for AC-power-signal-biased visible light communication system [8645-20]
Y.-F. Liu, National Chiao Tung Univ. (Taiwan); C.-H. Yeh, Industrial Technology Research Institute (Taiwan) and Fu Jen Catholic Univ. (Taiwan); C.-W. Chow, National Chiao Tung Univ. (Taiwan); Y. Liu, Hong Kong Productivity Council (Hong Kong, China)

Comparison of VLC-based indoor positioning techniques [8645-21]
W. Zhang, M. Kavehrad, The Pennsylvania State Univ. (United States)
Demonstration of using digital FIR filter and matched filter to increase data rate in visible light communication [8645-22]
Y.-F. Liu, National Chiao Tung Univ. (Taiwan); C.-H. Yeh, Industrial Technology Research Institute (Taiwan) and Fu Jen Catholic Univ. (Taiwan); C.-W. Chow, P.-Y. Huang, National Chiao Tung Univ. (Taiwan); Y. Liu, Hong Kong Productivity Council (Hong Kong, China)

POSTER SESSION

Sensing RF signals with the optical wideband converter [8645-24]
G. C. Valley, G. A. Sefler, T. J. Shaw, The Aerospace Corp. (United States)

Overview of the performances of PMMA-SI-POF communication systems [8645-26]
S. Straullu, S. Abrate, Istituto Superiore Mario Boella (Italy)

Precoding techniques for PAPR reduction in asymmetrically clipped OFDM based optical wireless system [8645-28]
B. Ranjha, M. Kavehrad, The Pennsylvania State Univ. (United States)

Minimalist-design, high-functionality, micro-ring resonator-based optical filter with narrow linewidth and low group delay using Looped Back Over- and Under-coupled Resonator (LOBOUR) [8645-30]
B. Ye, Binghamton Univ. (United States); B. B. Dingel, Naomi Photonics Inc. (United States); W. Cui, Binghamton Univ. (United States)

Author Index
Conference Committee

Symposium Chair

David L. Andrews, University of East Anglia Norwich (United Kingdom)

Symposium Cochairs

Alexei L. Glebov, OptiGrate Corporation (United States)
Klaus P. Streubel, OSRAM GmbH (Germany)

Program Track Chair

Benjamin B. Dingel, Nasfine Photonics, Inc. (United States)

Conference Chairs

Benjamin B. Dingel, Nasfine Photonics, Inc. (United States)
Raj Jain, Washington University in St. Louis (United States)
Katsutoshi Tsukamoto, Osaka Institute of Technology (Japan)

Conference Program Committee

Abdel-Karim Al-Tamimi, Yarmouk University (Jordan)
Arjan Durresi, Indiana University-Purdue University Indianapolis (United States)
David W. Faulkner, British Telecom Research Laboratories (United Kingdom)
Mahbub Hassan, The University of New South Wales (Australia)
Mohsen Kavehrad, The Pennsylvania State University (United States)
Rangaraj Madabhushi, Madabhushi Consultants, LLC (United States)
Nicholas Madamopoulos, The City College of New York (United States)
Spiros Mikroulis, Technological Educational Institute of Athens (Greece)
Ken-ichi Sato, Nagoya University (Japan)
Chakchai So-In, Khon Kaen University (Thailand)
Atul K. Srivastava, NEL America, Inc. (United States)
Peter Van Daele, Universiteit Gent (Belgium)
Session Chairs

1. Optical Communication Plenary Session: Joint Session with Conferences 8645, 8646, and 8647
   - Benjamin B. Dingel, Nasfine Photonics, Inc. (United States)
   - Atul K. Srivastava, NEL America, Inc. (United States)

2. Terabit Capacity, Flexible-Grid Optical Transmission Systems, and Advanced Access Network: Joint Session with Conferences 8645, 8646, and 8647
   - Guifang Li, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
   - Werner Weiershausen, Deutsche Telekom AG (Germany)

3. Integrated Network Photonics Devices for Next-Generation Network: Joint Session with Conferences 8645, 8646, and 8647
   - Martin Bouda, Fujitsu Network Communications Inc. (United States)
   - Benjamin B. Dingel, Nasfine Photonics, Inc. (United States)

4. Next Generation Access Network
   - Bishnu P. Pal, Indian Institute of Technology Delhi (India)
   - Spiros Mikroulis, Technological Educational Institute of Athens (Greece)

   - Katsutoshi Tsukamoto, Osaka Institute of Technology (Japan)

   - Achyut K. Dutta, Banpil Photonics, Inc. (United States)
   - Katsutoshi Tsukamoto, Osaka Institute of Technology (Japan)

7. Advanced Visible Light Communication Systems: Joint Session with Conferences 8645 and 8646
   - Mohsen Kavehrad, The Pennsylvania State University (United States)
Introduction

Welcome to the Photonics West 2013 conference ‘Broadband Access Communication Technologies VII’.

Since 2011, we have attempted to provide a holistic program with multiple joint sessions that cut across the three optical-communication related conferences, namely:

1. Broadband Access Communication Technologies,
2. Optical Metro Networks and Short-Haul Systems, and

This is our third year in continuing this successful format in order to promote broad as well as in-depth discussions and disseminations of inter-related designs, developments, and performances of various emerging communication technologies across the access-area, optical metro-area, and long-haul space.

Furthermore, this year we also added special panel discussion on hot topics through the large efforts of Dr. Atul K. Srivastava, one of the co-chairs of the Optical Metro Networks and Short-Haul Systems conference.

With regards to the Broadband Access Communication conference, we continue to provide discussions and dissemination of information on platform technologies such as optical fiber-based, radio-over-fiber-based, photonics-based, copper-based, satellite-based, mobile wireless-based, and power-line communications, and emerging technologies such as green broadband access and data centers.

We are honored to assemble well-known invited speakers and are encouraged to receive high quality contributed technical papers from Asia, Europe, and North America as is evident in our programs. These interesting papers and talks, together with excellent joint sessions, are made possible through the cooperation and leadership of all the three conference chairs involved.

The continuing success of this conference is strongly due to all the speakers and authors of all the contributed and invited papers, the valuable efforts of the technical program committee members, and the great assistance of the SPIE staff.

Benjamin B. Dingel
