Note: Please use rigorous, formal arguments. If you are asked to provide an algorithm then you may either write pseudocode similar to the pseudocode in the DPV text, or provide a clear description in English (similar to the description of the permutation algorithm given in the Homework 1 handout). You must also provide an argument for why the algorithm is correct, and an analysis of the running time. All problems this week are from the DPV text. We encourage you to collaborate with other students, while respecting the collaboration policy. Please write the names of all the other students you collaborated with on the homework. **Hardcopies are required by submission time. E-mailed versions will not be accepted.**

1. (5 points) Problem 4.1 (page 120).
2. (5 points) Problem 4.2 (page 120).
3. (5 points) Problem 4.8 (page 121).
4. (5 points) Problem 4.10 (page 121).
5. (10 points) Problem 4.13 (pages 121-122).
7. (10 points) Problem 4.21 (page 125).
