Volume 8282

Proceedings of SPIE, 0277-786X, v. 8282

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, similar font. To the right of the text is a stylized graphic consisting of three vertical bars of varying heights, with a curved line arching over them.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v	<i>Conference Committee</i>
vii	<i>Introduction</i>

OPTICAL COMMUNICATIONS PLENARY SESSION

8282 02	Optical coherent technologies in next generation access networks (Plenary Paper) [8282-01] K. Iwatsuki, NTT Corp. (Japan); K. Tsukamoto, Osaka Univ. (Japan)
---------	---

SESSION 1 ADVANCED SIGNAL PROCESSING: JOINT SESSION WITH CONFERENCE 8284

8282 03	Optical signal processing for wireless transmission (Invited Paper) [8282-02] T. Kawanishi, National Institute of Information and Communications Technology (Japan)
8282 04	Adjustable transfer function optical filter for microwave applications [8282-03] N. Madamopoulos, J. Kuang, The City College of New York (United States); A. Prescod, Corning, Inc., (United States)

SESSION 2 HIGH-CAPACITY COHERENT OPTICAL TECHNOLOGIES: JOINT SESSION WITH CONFERENCE 8284

8282 05	Coherent OCDMA communication systems (Invited Paper) [8282-04] X. Wang, Heriot-Watt Univ. (United Kingdom)
8282 06	VCSEL-based optical transceiver module operating at 25 Gb/s and using a single CMOS IC [8282-05] G. Afriat, L. Horwitz, D. Lazar, A. Issachar, A. Pogrebinsky, A. Ran, E. Shoor, R. Bar, R. Saba, Intel Corp. (Israel)

SESSION 3 NEXT-GENERATION DEVICES AND COMPONENTS: JOINT SESSION WITH CONFERENCES 8283 AND 8284

8282 08	Power balancing effect on the performance of IMPACC modulator under critical coupling (CC), over coupling (OC), and under coupling (UC) conditions at high frequency [8282-07] B. B. Dingel, Nasfne Photonics, Inc. (United States); N. Madamopoulos, The City College of New York (United States); A. Prescod, Corning Inc. (United States); R. Madabhushi, Madabhushi Consultants, LLC (United States)
---------	--

SESSION 4 SPECIAL SESSION ON OPTICAL TECHNOLOGIES FOR MOBILE MICROWAVE ACCESS

8282 0A	Optical transport technologies in mobile broadband radio systems (Invited Paper) [8282-09] Y. Horiuchi, KDDI R&D Labs., Inc. (Japan)
---------	--

- 8282 0B **Transportation of a microwave environment over networks and the applications (Invited Paper)** [8282-10]
Y. Shoji, National Institute of Information and Communications Technology (Japan)

SESSION 5 RADIO-OVER FIBER COMMUNICATION AND ACCESS PRICING

- 8282 0D **Pricing by timing: innovating broadband data plans (Invited Paper)** [8282-12]
S. Ha, C. Joe-Wong, S. Sen, M. Chiang, Princeton Univ. (United States)
- 8282 0F **Analog photonic link by using DFB lasers operated in the low laser threshold current region and external modulation** [8282-14]
A. García-Juárez, Univ. de Sonora (Mexico); I. E. Zaldívar-Huerta, Instituto Nacional de Astrofísica Óptica y Electrónica (Mexico); J. Rodríguez-Asomoza, Univ. de las Américas Puebla (Mexico); R. Gómez-Colín, A. G. Rojas-Hernández, D. Berma-Mendoza, R. Gómez-Fuentes, A. Vera-Marquina, Univ. de Sonora (Mexico)
- 8282 0G **Evaluation on a costless 60-GHz OFDM-based indoor wireless over multimode fiber green system employing a photonic integrated smart antenna (Invited Paper)** [8282-15]
S. Mikroulis, P. Sotiropoulos, E. Pikasis, Technological Educational Institute of Athens (Greece); G. Agapiou, Hellenic Telecommunications Organization (Greece)
- 8282 0H **Temperature impairment characterization in radio-over-multimode fiber systems** [8282-20]
C. Vázquez, D. S. Montero, Univ. Carlos III de Madrid (Spain)

SESSION 6 METRO AND ALTERNATIVE ACCESS TECHNOLOGIES (VISIBLE LIGHT COMMUNICATION): JOINT SESSION WITH CONFERENCE 8283

- 8282 0I **Visible light communication in dynamic environment using image/high-speed communication hybrid sensor** [8282-16]
K. Maeno, M. Panahpour Tehrani, T. Fujii, H. Okada, T. Yamazato, M. Tanimoto, Nagoya Univ. (Japan); T. Yendo, Nagaoka Univ. of Technology (Japan)
- 8282 0J **Energy efficient lighting and communications** [8282-17]
Z. Zhou, M. Kavehrad, The Pennsylvania State Univ. (United States); P. Deng, Wuhan National Lab. for Optoelectronics (China)
- 8282 0K **The Smart Room: a 100 Mb/s integrated optical access point transceiver for indoor visible light communication** [8282-18]
N. B. Datiri, A. Mirvakili, C. Sthalekar, E. Fu, C. Xi, S. Nercessian, T. Shah, B. Noorani, V. J. Koomson, Tufts Univ. (United States)
- 8282 0L **Hybrid positioning with lighting LEDs and Zigbee multihop wireless network** [8282-19]
Y. U. Lee, S. Baang, J. Park, Hallym Univ. (Korea, Republic of); Z. Zhou, M. Kavehrad, The Pennsylvania State Univ. (United States)

Author Index

Conference Committee

Symposium Chair

Klaus P. Streubel, OSRAM GmbH (Germany)

Symposium Cochairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)

Liang-Chy Chien, Kent State University (United States)

Program Track Chair

Benjamin Dingel, Nasfina Photonics, Inc. (United States)

Conference Chairs

Benjamin Dingel, Nasfina Photonics, Inc. (United States)

Raj Jain, Washington University in St. Louis (United States)

Katsutoshi Tsukamoto, Osaka University (Japan)

Program Committee

Abdel-Karim Al-Tamimi, Yarmouk University (Jordan)

Arjan Durresi, Indiana University-Purdue University Indianapolis
(United States)

David W. Faulkner, British Telecom Research Laboratories
(United Kingdom)

Mahbub Hassan, The University of New South Wales (Australia)

Mohsen Kavehrad, The Pennsylvania State University (United States)

Rangaraj Madabhushi, Madabhushi Consultants, LLC (United States)

Nicholas Madamopoulos, The City College of New York (United States)

Dalma Novak, Pharad, LLC (United States)

Jean-Charles Point, JCP-Consult (France)

Ken-ichi Sato, Nagoya University (Japan)

Chakchai So-In, Khon Kaen University (Thailand)

Peter Van Daele, Universiteit Gent (Belgium)

Jeroen S. Wellen, Alcatel-Lucent (Netherlands)

Session Chairs

Optical Communications Plenary Session

Benjamin Dingel, Nasfine Photonics, Inc. (United States)

Guifang Li, CREOL, The College of Optics and Photonics, University of Central Florida (United States)

- 1 Advanced Signal Processing: Joint Session with Conference 8284
Katsutoshi Tsukamoto, Osaka University (Japan)
Dieter Stefan Jäger, Universität Duisburg-Essen (Germany)
- 2 High-Capacity Coherent Optical Technologies: Joint Session with Conference 8284
Roland Ryf, Alcatel-Lucent Bell Laboratories (United States)
Benjamin Dingel, Nasfine Photonics, Inc. (United States)
- 3 Next-Generation Devices and Components: Joint Session with Conferences 8283 and 8284
Guifang Li, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
Werner Weiershausen, Deutsche Telekom AG (Germany)
- 4 Special Session on Optical Technologies for Mobile Microwave Access
Raj Jain, Washington University in St. Louis (United States)
Katsutoshi Tsukamoto, Osaka University (Japan)
- 5 Radio-over Fiber Communication and Access Pricing
Katsutoshi Tsukamoto, Osaka University (Japan)
Andru J. Prescod, Corning Incorporated (United States)
- 6 Metro and Alternative Access Technologies (Visible Light Communication): Joint Session with Conference 8283
Atul K. Srivastava, OneTerabit (United States)
Raj Jain, Washington University in St. Louis (United States)

Introduction

It is our continuing pleasure to welcome all of you to the Photonics West 2012 conference on Broadband Access Communication Technologies VI. This is our sixth year and our on-going purpose is still to promote discussions and disseminations of design, development, and performance of various types of emerging broadband access communication technologies.

Since last year, we have attempted to provide an integrated program with multiple joint sessions that cut across the three optical-communication related conferences, namely;

- (1) Broadband Access Communication Technologies VI,
- (2) Optical Metro Networks and Short-Haul Systems IV, and
- (3) Next Generation Optical Communication: Components, Subsystems, and Systems II, (formerly Coherent Optical Communication: Components, Subsystems, and Systems).

The three conferences have assembled well-known invited speakers and solicited high quality technical papers coming from Asia, Europe, and North America as evident in our programs. These excellent joint sessions are made possible through the cooperation and leadership of all conference chairs involved.

In particular, we in the Broadband Access Communication conference continue to provide discussions and disseminations for platform technologies such as optical fiber-based, radio-over-fiber-based, photonics-based, copper-based, satellite-based, mobile wireless-based and power-line communications, and emerging technologies such as green broadband access that have relevance to the optical Metro as well as to the emerging technologies of Coherent Communications. We have invited a number of well-known speakers to present the current and future trends of these broadband access technologies as well as the economics of pricing in access.

Finally, we acknowledge and appreciate the speakers and authors of all the contributed and invited papers, the technical program committee members, and SPIE staff for all their valuable efforts. The success of this conference is strongly due them.

Benjamin Dingel
Raj Jain
Katsutoshi Tsukamoto
